

WHAT IS BOT?

BOT (Build-Operate-Transfer) is XTGlobal's Offshore Employee Delivery Model that enables companies to make a soft landing in India with World-Class Offshore Development Centers.

ABOUT XTGLOBAL

XTGlobal, a US-Headquartered IT firm which has been in business since 1998, has over 500 employees in its US and Indian locations. Our 22 plus years of experience in IT as a Microsoft and Oracle Partner is complemented by our true expertise in the form of proven repeatable processes and our people. The BOT model allows companies flexibility with product demands along with the ability to see deeper cost savings vs any other model whether it be on-shore resources or project outsourcing with near-shore or off-shore resources.

HOW YOU BENEFIT

Reduction in IT resource cost of over 70% compared to traditional US resource cost.

100% transparency in operations and cost.

No investment in Facilities, Infrastructure, Transfer Pricing, and Local Taxes for setting up an Offshore Delivery Center of Excellence.

World Class Infrastructure and Facilities owned by XTGlobal in two Tier 1 cities of India - Hyderabad (25,000 sq.ft.) and Visakhapatnam (185,000 sq.ft.) including On-site Cafeterias and Recreation Facilities.

High performance IT Talent and Support Staff (HR, Legal, Finance) with no hassles of hiring.

Once the team is built, the client gets complete operational control over it to optimize their projects.

Scalable operational support with minimal security risk that will complement the client's in-house IT teams.
